SUMMARY

Computer Science graduate specialising in Data Science with hands-on experience developing automation systems, backend services, analytics platforms, and full-stack applications. Built software used by 1,000+ students and delivered production-oriented solutions involving Python, SQL, APIs, databases, and cloud deployment. Seeking graduate software engineering, backend, or full-stack development opportunities.

EDUCATION

- Multimedia University** Cyberjaya, Malaysia
Bachelor of Computer Science (Honours) (CGPA: 3.50/4.00) *Oct. 2023 - Aug. 2026*

EXPERIENCE

- Presoft (M) Sdn. Bhd.** Puchong, Malaysia
Software Development Intern — Business Systems & Automation *Jul 2025 — Oct. 2025*
 - Automated Operational Reporting:** Built Python workflows to extract and process SQL Server data, reducing repetitive manual reporting work.
 - Integrated Payment & CRM Workflows:** Evaluated Stripe and Billplz APIs and developed Zoho Bigin API utilities, supporting automated payment testing and CRM reporting.
 - Streamlined Business Monitoring:** Combined SQL Server, Python, and Power BI into operational dashboards, providing actionable insights for business decision-making.

PROGRAMMING SKILLS

- Languages:** Python, TypeScript, JavaScript, SQL, C#, Java, C++, R
- Web Development:** React, Next.js, Node.js, Express, HTML, CSS, Tailwind CSS
- Databases:** PostgreSQL, MySQL, SQL Server, Supabase, Firebase
- Tools & Platforms:** Git, Docker, Power BI, Streamlit, Railway, Render, Vercel, Netlify
- Concepts:** REST APIs, Automation/Scripting, OOP, SQL, Data Processing, Responsive Design
- Languages (Human):** English, Malay, Mandarin, Cantonese

SELECTED PROJECTS

- Study with Junn** [↗](#) : Built a searchable educational resource platform serving 1,000+ MMU students with mobile-accessible course notes and examination resources. - *HTML, CSS, JavaScript*
- Student Wellbeing Assessment Platform (FYP)** [↗](#) : Developed an end-to-end machine learning platform using an ensemble of 12 classification models, enabling interactive assessment, model explainability, and analytics reporting. - *Python, Streamlit, Scikit-learn, SHAP, Supabase, PostgreSQL, Docker*
- Discord Utility Bot** [↗](#) : Developed a modular Discord bot with configurable reminders, GitHub tracking, scraping utilities, and persistent data storage. Optimized runtime memory usage to approximately 80 MB, enabling reliable deployment on low-resource hosting environments. - *Python, discord.py, PostgreSQL, Supabase, Railway*
- MDEC Digitalisation Automation Report:** Automated monthly digitalisation reporting by replacing repetitive browser lookups and spreadsheet workflows with a configurable Python data-processing pipeline. Implemented Selenium automation with retry handling, fallback lookups, structured logging, and API/SQL data enrichment, then packaged the system as a standalone executable for operational staff. - *Python, Selenium, SQL, Excel, Automation, Data Processing, PyInstaller*

CO-CURRICULAR ACTIVITIES / LEADERSHIP EXPERIENCES

- IT Society MMU Cyberjaya** [↗](#) Cyberjaya, Malaysia
Technical Division Member *Jan. 2025 - Dec. 2025*
 - MMU Clubs Platform:** Contributed to backend development using React.js, Express.js, and Supabase, supporting administrative workflows and database-driven club management.
 - CodeNecton 2025:** Contributed to the event website and supported live technical operations, ensuring reliable presentation systems and venue technology during the event.
- Hackerspace MMU** [↗](#) Cyberjaya, Malaysia
Member *Aug. 2024 - Present*
- CodeNecton 2024** [↗](#) Cyberjaya, Malaysia
Competitive Programming Participant — 10th / 57 Teams *Nov. 2024*

- **Game Development Club MMU Cyberjaya** 
Event Management Member

Cyberjaya, Malaysia
Jan. 2025 - Present
